Anton Seledets

Sr. DevOps @ First Line Software
Serbia

Summary

Driving DevOps Culture | Innovating in AI, IoT, AgTech & Beyond
Solo Entrepreneur | Exploring the Future Through AI, Tech &
Automation

Fueled by curiosity and the drive to build what's next. I thrive at the
intersection of AI, ML, IoT, robotics, and AgTech—where technology
transforms industries and redefines possibilities.

As a solo entrepreneur, I embrace the challenge of pushing
boundaries, automating the future, and unlocking breakthroughs that
propel humanity forward.

The future isn't waiting—it's being built now.
Let's accelerate! #

Experience

First Line Software
Sr. DevOps
September 2025 - Present (2 months)
Belgrade, Serbia

Midlibrary.io
CTO | Co-Founder
September 2024 - Present (1 year 2 months)
Georgia

As a Chief Technology Officer (CTO), I specialize in driving innovation and
aligning technology strategies with business goals to deliver impactful results.
With a focus on leveraging emerging technologies, I lead teams to design
scalable, secure, and efficient solutions that support organizational growth.
Passionate about bridging the gap between technical expertise and business
vision.

Coriolis Innovations
Owner | DevOps | Consultant
July 2014 - Present (11 years 4 months)

• Managed Linux and Windows servers, including infrastructure management and 2nd line support.
• Developed proof of concepts for CI/CD pipelines using Gitlab for .Net applications.
• Supported SaaS services and developed infrastructure using tech stack like LAMP, Nginx, MySQL, and more
• Conducting best practices for On-Prem to cloud migration
• Implementing SecOps and FinOps practices in Cloud of Hybrid infrastructure

Align Technology
9 years 2 months

Sr. DevOps Engineer
May 2023 - September 2025 (2 years 5 months)
Yerevan, Armenia

• Built serverless infrastructure for dental computations and ML using AWS and AWS Serverless technologies.
• Implemented IaC with Terraform, OpenTofu, Terragrunt, and AWS CFN for efficient deployment and management.
• Led CI/CD processes and utilized scripting languages like Bash and Python for automation.
• Utilized Docker for containerization to streamline development and deployment processes.

DevOps Manager
November 2022 - May 2023 (7 months)
Yerevan, Armenia

In my role as a DevOps Manager at Align Technology, I led a team of 7 engineers in 2 locations, ensuring efficient knowledge sharing and prioritization of backlog for embedded DevOps projects. I coordinated efforts between team members, monitored load and capacity, and provided mentorship through 1:1 meetings, serving as the first escalation point for the Application Dev Lead.

DevOps Manager
September 2019 - November 2022 (3 years 3 months)
Moscow, Moscow City, Russia

• Managed a team of 8 in a matrix org structure, ensuring knowledge sharing and strong engineering culture.

• Prioritized and updated embedded DevOps backlog, coordinating efforts and monitoring team progress.
• Conducted 1:1 meetings, supervised team growth, and served as the first escalation point for Application Dev Lead.

DevOps Engineer
August 2016 - September 2019 (3 years 2 months)
Moscow, Russian Federation

• Managed CI/CD pipelines using Atlassian Bamboo and Docker, ensuring smooth deployment processes.
• Designed and implemented AWS infrastructure for development environments, utilizing AWS CFN and Terraform.
• Supported customer-facing applications and troubleshoot issues, fostering a culture of DevOps within the team.

Intergalactic XYZ
CTO | Founder
February 2022 - February 2024 (2 years 1 month)
California, United States

• Spearheaded the development of cutting-edge agricultural technology solutions at Intergalactic XYZ, revolutionizing the farming industry.
• Implemented innovative strategies to optimize crop production and sustainability practices, driving significant positive impacts on the agricultural landscape.
• Led a team of talented professionals to create groundbreaking solutions that elevated the company's position as a pioneer in the field.

IntraVision
Infrastructure Project Manager / Admin
February 2015 - August 2016 (1 year 7 months)

• Managed infrastructure projects, including Windows servers and Linux systems administration, scripting, automation, and infrastructure design.
• Evaluated and implemented new technologies like Docker, Hyper-V, and Proxmox for containers and virtualization.
• Conducted technology evangelism to promote innovative solutions and enhance company's IT capabilities.

Luxoft
Technical Consultant
October 2013 - February 2015 (1 year 5 months)

Delivered outsourced second-line support, troubleshooting, and urgent issue resolution for a custom in-house ERP system, serving a major food production company's local branch as the end client.
